

REJUVEN8

Advanced Skin Rejuvenation Serum

WITH GOJI STEM CELL TECHNOLOGY

Your skin will look and feel it's best ever! REJUVEN8 is an innovative skin care product that revitalizes and protects the delicate stem cells in the skin against premature aging and sun-damage. The potent, lightweight daily serum is so effective that you can expect to see noticeable results within just 30-45 days of regular use.

The proprietary formula is backed by real research, real studies, and real results. REJUVEN8 is powered by an advanced Goji stem cell extract technology that has been found in multiple studies to significantly strengthen, repair, and refine the skin – resulting in improved skin appearance, condition, and vitality.

Restore and pamper beautiful, younger-looking, healthy skin with REJUVEN8. The deeply penetrating formulation has powerful skin rejuvenating and anti-aging effects. In clinical studies, it has been shown to significantly improve collagen and elastin production in the skin. The results are amazing! It visibly firms and lifts sagging skin as well as diminishes fine wrinkles and deeper lines. Plus, it is naturally moisturizing and softens dry, damaged skin.

Rejuvenate Your Beautiful Skin!

BENEFITS MAY INCLUDE:

- Boost Collagen and Elastin in the Skin
- Minimize Fine Wrinkles and Deeper Lines
- Firm and Lift Up Skin to Visibly Reduce Sagging
- Moisturize and Soften Dry Skin
- Increase Vitality and Longevity of Skin Stem Cells

PRODUCT DETAILS:

- Advanced, Daily Skin Care / Rejuvenation Serum
- Powered by Proprietary Goji Stem Cell Extract Technology
- Proven Formula Backed by Clinical Studies

Advanced Skin Care Serum

ADDITIONAL DETAILS

Proven, Proprietary Goji Stem Cell Technology

REJUVEN8 from B-Epic is powered by a high-quality goji stem cell extract that has been found in multiple studies to revitalize the delicate, aging stem cells in our skin.

Our unique, advanced skin rejuvenation serum is based on an innovative, proprietary technology that enables the sustainable cultivation and large-scale production of goji plant stem cells to be used in a cosmetic formulation in order to improve the function of skin stem cells.

As we age, the production of collagen and elastin is reduced, which results in sagging, wrinkled skin. In addition, over time our skin stem cells naturally lose their regenerative properties, which further leads to aged, damaged skin.

Scientific research has found that the proprietary Goji stem cell extract used in REJUVEN8 revitalizes skin stem cell function and improves collagen and elastin production thereby rejuvenating and regenerating the skin.

Significant findings include stimulation of skin stem cell functioning, improved density of healthy fibers in the skin (epidermis + dermis), visible reduction of fine wrinkles and deeper lines, and the lifting and firming up of the skin (e.g., resulting in visibly more tightened, lifted, and contoured shape along jawline and neck).

The Remarkable Healing Power of the Goji

For hundreds of years, goji berries have been eaten in Asia for their medicinal and nutritive properties. According to legend, goji berries were first discovered by a Buddhist monk, and it transpired that the monks who incorporated them into their diets lived longer than those who did not.

Because of the remarkable, claimed health benefits in traditional medicine, the chemical compounds in the goji fruit, root, and other parts of the plant have been studied in some detail. Recent research has confirmed that the healing mechanism of the goji plant has a positive, healing effect on human skin cells.

Advanced Skin Care Serum

RESEARCH RESULTS

REJUVEN8 is backed by real research, real studies, and real results. The following are highlights from some of the studies conducted on the proprietary Goji stem cell extract in REJUVEN8. The results are significant and, in all cases, greatly outperform placebo. Visible improvements over initial, untreated conditions can be seen in as little as one month; with even greater, sustained improvements with continued use over time.

Visible Smoothing and Reduction of Wrinkles

Twice daily treatment after two months significantly reduced the appearance of wrinkles in the eye area. Notably, not only did fine wrinkles below the eye appear smoother (see upper panel), but deeper lines were also visibly diminished (see lower panel).

Improvements in Skin Density

Treatment after 1 month significantly increased skin density by 6% and improved the collagen and elastin fiber structure of aged, sun-damaged skin.

Decrease in Wrinkle Depth

Treatment after 2 months led to an average decrease in wrinkle depth of 11% compared to initial, untreated conditions and significantly outperformed placebo.
